WORK EXPERIENCE

Front-End Trainee

FPT Information System - Hanoi, Vietnam
May 2023 - August 2023 (4 months)

- Enhancing a car booking website by developing features, optimizing code, and conducting maintenance and testing. Demonstrating strong software engineering skills to ensure a seamless user experience.
- Technologies: React, Node, Typescript, JavaScript, Material-UI, Vite

PROJECTS

Student Management Software

Technologies: Python, SQLite

- Description: Creating small-scale application integrated with a database system aimed at efficiently managing student data. A pivotal feature of this application is its capability to automate student ID generation with accuracy, ensuring each ID is unique.
